

 **ARISTON**
The home of sustainable comfort

**Electric water
heaters
catalogue**

The home of sustainable comfort

As a **leading specialist** in heating and water-heating with over 90 years of history, Ariston understands well the challenges in creating practical and high-performance products and systems that guarantee exceptional levels of comfort and efficiency. That is why it has set itself a new mission – **to give more homes access to sustainable comfort solutions** using less energy and effort.

To this end, it has further strengthened its commitment to delivering **high-quality, renewable and energy-efficient solutions** that can simplify and improve the quality of home life while empowering people to live more sustainably.

By successfully combining its global reach with an in-depth focus on the needs of the different markets where it has a presence, Ariston prides itself in being the home of sustainable comfort: a reference brand trusted worldwide by millions of families and industry professionals longing for advanced thermal comfort solutions that **not only are easy to use and maintain but also use as little energy as possible.**

Our story, driven by your needs

Ariston's continuous growth has been fueled by its commitment to provide people with reliable and highly-efficient comfort solutions to improve and enjoy life at home. Each step of the way we have been driven by the existing and emerging needs of our customers, and our solutions have been conceived with their lifestyle in mind.

'30s

Foundation

Aristide Merloni founds "Industrie Merloni" company in the Marche Region of Italy, and starts the production of weighing scales.

'80s

Heating

We consolidate our market leadership in water heating and the production of boilers begins.

'60s

Water heating

The Ariston brand is launched and the production of electric water heaters begins.

'90s

Global expansion

With the launch in China and Russia, we begin to evolve into a global brand.

'10s

Ariston Comfort Challenge

With this mission, Ariston proved the ability of its products to guarantee exceptional performance, durability and efficiency's levels in every condition, even where it seems impossible. It was a huge challenge, but it was just the beginning.

'00s

Renewable technologies

We successfully develop and launch our new model in heat pump, which marks our development into innovative and sustainable heating technology.

'20s

The home of sustainable comfort

We strengthen our commitment to providing our end-users with products that generate heating and hot water in the most efficient and renewable way possible. A tangible sign of our dedication to respecting everything that surrounds us.

Why choose Ariston?

We are a global **thermal comfort specialist**

Standing out as **global leader in heating and water-heating with more than 90 years of expertise**, Ariston boasts an extensive product and service portfolio equally focused on the provision of renewable and high-efficiency heating and hot water solutions. With its

proven ability to meet the local needs of every country where it has a presence, our company is **trusted and welcomed by millions of families around the world**, while also being the **preferred choice for thousands of professionals**.

We are masters of **renewable and high-efficiency solutions**

Sustainable comfort lies at the heart of our company and our commitment is to provide our customers with products and systems that **generate heating and hot water in the most efficient and renewable way possible**, whatever their energy source. Choosing Ariston means gaining access to a broad and comprehensive range of high-performance and easy-to-use solutions that not only will play a significant role in the reduction of energy bills, but also represent the perfect upgrade for a more sustainable home thanks to **smart connectivity and the latest technologies** being developed for environmentally-friendly heating and water heating.

Wide offer in last generation **heat pumps for heating and hot water and solar**

2.5%

of revenues invested annually in **R&D** with growing focus on renewable products*

Efficient

hybrid systems

tailored for every need

79%

of turnover from innovative products (younger than 5 years)*

Commitment to frontier R&D

(Hydrogen, gas absorption heat pump, demand-response, natural refrigerants)

Connectivity in all Heating and Water Heating segments

*The data refer to Ariston group, worldwide portfolio of solutions.

We are dedicated to enduring quality

Our products and solutions are made to last, so are of the highest quality. We achieve this by using the best components and materials available and through rigorous checks taking place before, during and after production. For maximum serenity, **every product we sell comes with a solid warranty**. But not only that; anyone purchasing one of our products can be reassured there will always be a point of contact available to deal with anything. **High standards of quality apply to all our processes and functions**: our facilities are involved in a continuous performance and quality monitoring process, constantly improving every aspect of manufacture, plant maintenance and distribution logistics.

100%

checked and tested products

>95%

of our products require no technical interventions in their first 5 years of service*

High-quality
after-sales service
always available

Effective
warranty
guarantees

We are champions of **home and planet**

Italian in origin, since its founding in 1930 Ariston has been synonymous with innovation and sustainability and has been **driven by the mission to make every home a haven of comfort** – while maintaining a strong focus on the environment. As a leading global brand, we now feel at home

in almost every part of the world. And because we see **the world as the home we all share**, we develop products and solutions that represent an accessible and effective way for anyone to improve and enjoy life at home while making more responsible and energy-conscious choices.

Believe in sustainability

Our purpose is to provide **everyone, in every corner of the world, with high-quality heating and water heating solutions, while protecting the environment.**

To this end, we have placed energy efficiency and technologies using energy from renewable sources at the centre of our sustainable growth strategy, thus acting consistently with the sustainable

development goals endorsed by the General Assembly of the United Nations.

This commitment is reflected in the effort we invest in developing efficient and sustainable products, solutions and processes that can make a decisive contribution to reducing energy consumption and environmental impact without sacrificing comfort.

SUSTAINABLE DEVELOPMENT GOALS

The economic, social and environmental impacts generated through Ariston Thermo Group's operations contribute towards 9 of the 17 sustainable development goals, including:

Sustainable cities and communities

Ariston Thermo Group's commitment to energy-efficient solutions will enable citizens to use clean energy to its fullest potential. Replacing low-efficiency products with Ariston's new high-efficiency technologies will allow to curb carbon dioxide emissions by more than 3,4 Mln tons by 2022*.

Responsible consumption and production

All of our production plants around the world are at the centre of Ariston Thermo Group's energy efficiency plan. This consists in a long-term strategy that in 2019 allowed the Group to achieve a remarkable result: over 10,000 tons of CO2 equivalent avoided thanks to the energy efficiency of the production processes.

Climate action

During 2019 the Ariston Comfort Zone, a modular house equipped with Ariston's most advanced and efficient technology, enabled a group of researchers from the University of Copenhagen tasked with studying how climate change is affecting the Arctic ecosystem to conduct 22 new studies.

Pre-Sales and After-Sales technical support

Our services

We are always at your side In all phases of the realization of a project.

From the design of a plant, to the construction of the system itself and even after commissioning, a team of Ariston specialists is constantly available to provide support and assistance.

Pre-Sales

A team of technicians and engineers offer their support and their experience in the design of key-on-hand solutions, providing them with products, designs and maintenance services.

Technical Consultancy Center

The Technical Consultancy Center provides every day specialist consultancy and timely responses on the technical characteristics of installations.

The technical team is the right interlocutor with whom interface for design and maintenance of complex plants.

After-Sales

Our qualified Service Network provides technical support for startup, maintenance, troubleshooting and repair interventions, by remote and on field as well.

Our mission is to deliver high level of service, through solid know-how and quality of genuine spare parts, in order to ensure the Ariston products performance, long term reliability and make them exceed the Customer expectations.

ERP

Are you up-to-date with the new regulations?

Since 26 September 2015, the new European Union regulations define minimum efficiency and energy labelling requirements for boilers, heat pumps, micro-cogeneration, water heaters and hot water tanks.

On 26 September 2018 have been introduced new limits of NO_x emissions, in addition to the efficiency limits already in force. The NO_x limits have been applied to products placed on the market starting from 26 September 2018. Products purchased before that date and already in retail outlets or distribution warehouses can continue to be sold and installed, even though they do not comply with the new requirements.

26.09.2015

A++ (space heating) / **A** (water heating)

Compulsory labelling on space heating and water heating products (energy class)

2017

A+

introduced for domestic hot water production

26.09.2018

26.09.2019

A+++

introduced for space heating

Minimum performance requirements for space heating and domestic hot water production

New limits for NO_x emissions < 56 mg/kWh (for gas fuels)

Velis EVO PLUS

Hot water in record time

High-quality materials, flat shape and modern sleek lines enclosing the most advanced technologies in the sector. Thanks to the ability to deliver hot water in just 50 minutes, **Velis Evo Plus** is the perfect water heater for whoever wants an amazing product on every level, management included. With the SMART BLUE TECH touch screen display, you can now check how many showers are available and the waiting time for the next shower with Velis Evo Plus. You can also schedule two moments a day in which you want to have hot water ready for you.

Designed by **Umberto Palermo**, **Velis Evo** embodies the essence of Italian design, and will fit snugly into any bathroom as a real piece of furniture.

Double Tank technology

Hot shower is ready quicker

The innovative **Double Tank Technology** heats water faster than a standard round water heater. Each tank is equipped with a specific heating element and can therefore be heated independently, thus ensuring the ideal amount of hot water ready to use.

This particular technology allows you to have hot water for your first shower **in just 50 minutes***. Moreover, this water heating system ensures maximum silence.

* With reference to a 40 l shower at 40°C and inlet water temperature at 10°C.

Dry Heating technology

Additional safety

Thanks to the **Dry Heating Technology****, heating elements are encased in dedicated tubes to avoid direct contact with water. This provides additional safety against short-circuit and increased protection against limescale thus allowing a simple and quick replacement of heating element without draining the tank.

ECO EVO function

The hot water you need when you need it

The innovative **Eco Evo function powered by CoreTECH** memorizes your daily habits to give you hot water only when you need, thus allowing you to save energy and reduce costs.

* Estimated saving up to 25% on daily basis, compared to Ariston standard mechanical products.

**Available for specific models.

Aqua Ariston NET App

Smartly connected to you

The Ariston Net App keeps track of your water use habits in order to ensure that only the needed amount of energy is used, thus saving electricity and lowering your electric bill. **By connecting the product to the Wi-Fi and using the App, you can save energy up to 25%***. to monitor your consumption and save energy, daily, monthly or annual energy consumption reports expressed in kWh are available for consultations.

FREE DOWNLOAD

Download Aqua Ariston NET App now for free from:

Blue Tech touch display

It's all in the screen

The smart blue tech touch screen display provides detailed information on:

Showers available

Velis WI-FI clearly shows the water temperature on the display, while the number of showers can be viewed in the app.

ECO EVO function

High energy saving is achieved thanks to the self-adaptive function ECO EVO, which can be easily activated on the control panel.

Wi-Fi connection

Wi-fi can be activated by simply touching the dedicated button. Connecting your water heater with your smartphone is very easy.

Multi-position

Vertical and horizontal installation

Elegant and versatile, Velis Evo can be installed both horizontally and vertically. The display will fit with both configurations.

Velis Evo Plus

Flat and elegantly designed smart electric water heater

- / Superior design to match your home: exclusive Italian design, flat form factor and multiposition installation
- / Increase energy saving: up to 14% thanks to ECO EVO function which learn habits and optimize production

Energy Class

Features

- / Smart touch screen Blue Tech display showing the number of showers available and waiting time for the next shower
- / Eco Evo powered by CoreTECH
- / Daily programming
- / Ecological polyurethane insulation
- / ABS safety system in case of energy or water failures
- / Titanium enamelled double tank for a long durability
- / Multiposition installation
- / Only 27 cm deep
- / Exclusive Italian design
- / Silver metal finishing, to blend and fit the furniture of your bathroom

* Check if local product code is enabled for connectivity

Lydos range

The brand new hot water experience

WaterPlus technology

Enjoy the comfort of an extra hot shower

The ground-breaking patented **WaterPlus technology** keeps the incoming cold water at the bottom of the tank, thus **reducing the mix of cold and stored hot water**.

This allows up to **16% more hot water available***, to let you enjoy the comfort of an extra hot shower anytime you want.

ECO EVO function

The hot water you want, anytime

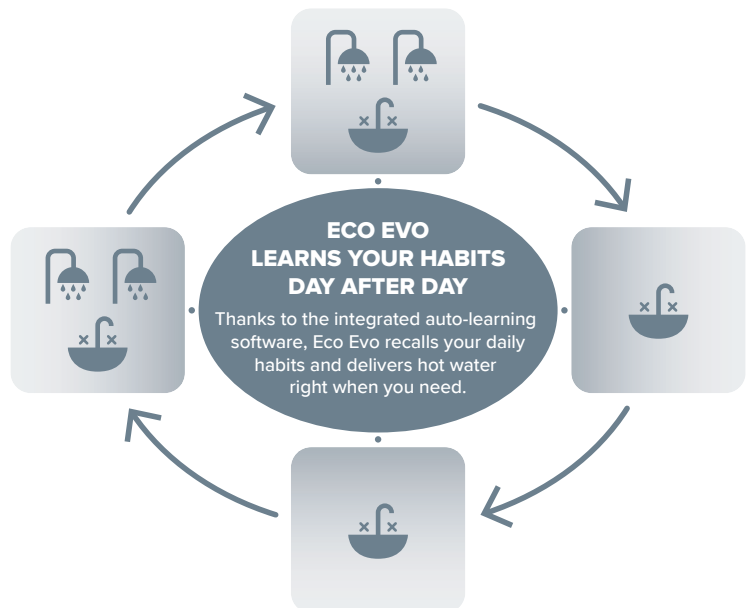

The innovative **Eco Evo function powered by CoreTECH** memorizes your daily habits to give you hot water only when you need, thus allowing you to save energy and reduce costs.

Maximum saving at home

Operating in compliance with top standards on energy efficiency within the electric water heating category, Eco Evo function is so smart that it learns from your habits and recalls when and how much hot water you use.

This spares you pointless waste, enabling you to **save up to 259 kWh per year**** and ensuring a 14% saving on your electric bill.

T-MAX

Hot water quickly

Thanks to the new functions **T-MAX** and **Shower Ready** it is possible to speed up the production of hot water and visualize the number of hot shower on the display***.

* Maximum estimated saving, depending on models. Comparison made using V40 test results at maximum operating temperature between current ATG products and new ATG products equipped with WaterPlus Technology.

** Estimated savings vs traditional electrical water heater based on the average European net demand of hot water (2007 VHK Ecodesign WH study). Savings change depending on product's capacity. Referred to B Class products.

*** Visualization of the number of showers available in real time only for Lydos Plus (on the digital display) and Lydos Wi-Fi (on the App).

Titanshield technology

Every day like the first day

Ariston has been always committed to developing products that last through time. For this reason, the water heater is equipped with the exclusive **TitanShield**, Ariston's double action technology that offers best tank protection with **titanium enameling** and **enhanced magnesium anode**.

Strong protection against corrosion

The inner surface of the tank is coated with a **titanium enamel**, while the **magnesium anode** prevents corrosion of the tank's inner surface and prolongs the life of your water heater.

Mineral barrier against limescale

Thanks to its unique properties, titanium naturally produces a dioxide film that **prevents limescale forming** on the inner surface of the tank.

Total Safety

Safe at all times

The **Absolute safety system** is a set of functions preserving the good functioning of the product in case of energy or water failures.

The safety package includes:

- / **Anti overheating:** in the event of an error, the high-precision electronic thermostat will shut off the heating cycle, thus **avoiding risk of burning out** due to overheating the element.
- / **Anti freezing:** in cold areas, frozen water can damage the water heater severely. This function keeps the water at a **minimum temperature of 5°C** even when the unit is turned off.
- / **Dry heating auto-diagnosys:** should there be a **lack of water in the tank**, the water heater is able to **detect this and prevents the heating cycle** from starting and damaging the unit.
- / **Anti legionella:** once a month, the unit will automatically raise the temperature of the water stored inside it to 65°C, in order to **eliminate the risk of legionella bacteria developing** and **keep the water healthy**.

T-FLEX

Heating power is in your hands

The new **T-FLEX software** optimally allows to easily change the heating power.

Whenever needed, it allows to **boost the water heating's speed and power**, or to slow them down.

/ **Multi-power management:** possibility to choose different power of the heating element.

/ **Low power function*:** lower the power of the heating element. A perfect solution when limited electrical power is available and for energy saving.

/ **Constant temperature:** precise and constant temperature management.

Italian design

Bring a masterpiece into your home

A contemporary and captivating creation by the Italian designer **Umberto Palermo**. Engineered and manufactured **in Italy** with high quality materials, Lydos will enter your house as a unique interior design piece.

All-round quality

Rounded shape, sleek aesthetic finishes and no visible screws. All enhanced with **new materials** for optimised performance.

User friendly interface

The **advanced hi-tech display** located at the front of the product resembles a smartphone screen and provides easy and fluent interaction together with practical temperature management.

DOUBLE SAFETY THERMOSTAT

TITAN SHIELD

HIGH EFFICIENCY INSULATION

Electric storage water heater

/ High performances: Up to 16% more hot water available with Waterplus technology

Features

- / Compliant with top regulations
- / External temperature setting
- / Double safety thermostat
- / Robust insulation material (polyurethane)
- / Magnesium anode to fight corrosion
- / High quality titanium enameled tank
- / 7 years warranty
- / Designed in Italy
- / Modern shape with "Ariston wave"

**Small capacity
electric storage
water heaters**

Advanced technologies meet increasingly intelligent performances and unmatched energy savings.

By using different energy sources, Ariston storage water heaters will ensure hot water comfort to all your family.

◆ Andris range

◆ Blu R

Andris range

Compact dimensions, high performance

Small dimensions

Through its use of the storage tank system and the comfort provided by the water heater, Ariston is focused on more compact dimensions. Despite the small dimensions, the three products are capable of satisfying your needs.

Lifespan

The choice of materials is the secret behind the durability of the Andris series of products: each has a copper heating components (heating element) to protect against the effects of corrosion. The more solid structure of the flange limits the risk of leaks and reduces the need for maintenance over time.

Maximum comfort

The Andris water heater is capable of maintaining the high temperature of domestic water for a long period of time through the use of polyurethane insulation which reduces heat loss in the water, increasing your comfort.

**Electric
instantaneous
water heaters**

New compact Aures range

Hyper speed, instant comfort

Instant heating technology

Instant comfort and unlimited hot water

Aures electric instant water heater uses electricity to **instantly deliver hot water at the desired temperature** thanks to its compact 0.4 l tank equipped with a **powerful heating element** which heats water as soon as it flows through the unit. Aures is **available in a wide range of power options** (from 2kW to 36 kW) to satisfy any need. With Aures Pro, the water temperature is kept constant at the desired level due to the action of the **high-performing thermostatic technology**.

Aures' compact size allows **simple installation also in narrow spaces** like the shower box or under the sink. **Easy maintenance and quick replacement** of the internal components are ensured.

Energy class A

The ultimate energy efficient solution

Aures is the most efficient way to provide hot water at the point of use. The whole Aures range boasts ErP energy class A, achieving top level of energy efficiency in the electric water heating segment. **All the electricity** taken from the electric network **is converted** into the necessary amount of hot water needed by the user. **The water is not pre-heated** and it is not stocked in a tank: an effective approach to **eliminate heat loss and reduce energy consumption**.

Total safety system

The peace of mind you are longing for

The **double pole Earth Leakage Circuit Breaker (ELCB)** prevents electric shocks, integrating with a total safety device system that **avoids the damage of the product**. If a dangerous voltage is detected, the device will interrupt the electrical circuit as a safety measure. Thanks to the excellent protection of the product against the ingress of water, **Aures Slim single point can be placed inside the shower space**.

Your guide to define the right model for every need

1 Choose the suitable range for your needs and infrastructure

Installation

How many water points do you want to supply?

/ One point (Single Point) → Aures Slim range

/ More than two points (Multi Point) → Aures Slim Multi & Aures Pro range

Correct installation

Correct installation

Incorrect installation

*Available as accessory

Incorrect installation

Single Point supplies only one water point directly connected to the appliance (unpressurized)

Multi Point can supply more water points at the same time (pressurized)

Quality Electric Network

Check the electric network features such as Power [kW], Ampere, Phase and the current consumption of the place where the product will be installed.

Usage

Which water points would you like to use (Tap, Shower, Bath)?

/ Based on the preferred water point the **average temperature** and **water flow** will differ.

/ Refer to the table below to understand the average flow rate for each water point:

WATER POINT	AVERAGE WATER FLOW
TAP	2-4 l/min
SHOWER	5-7 l/min
BATH	12-14 l/min
24	17,2

This is an estimation and it varies according to the geographical location.

2 Identify the right power needed

Which power (kW) is right for you?

There are two external factors which impact the power supply:

/ **Inlet Temperature:** what is your average ground water temperature?

/ **Water Flow:** how much water do you use at your peak time?

Example: the power needed for a simulated flow rate data for Δ Temperature ($^{\circ}$ C) = 20 $^{\circ}$ C, calculated using the formula

$$\text{Power} = \text{Flow Rate} \times \Delta\text{Temperature} \times 0,07$$

POWER [kW]	Δ TEMPERATURE [$^{\circ}$ C]	FLOW RATE [l/min]
4,9	20	3,5
9	20	6,5
12	20	8,6
24	20	17,2

How to read the symbols

The icons have been designed to facilitate the reading of the features of each product. Ariston makes it possible, from the very beginning, to quickly and easily identify performance levels, understand the different ranges and evaluate purchasing criteria.

In short, users can familiarise themselves with each machine without becoming confused or wasting time, in line with the Ariston philosophy of always offering the customer - and the professional technician - a service which is clear and easy to use.

SUPER SILENT

Silent functioning, respectful of the quiet of your everyday life

ENERGY EFFICIENT

Better exploitation of energy and renewable sources, enhanced performance

ITALIAN DESIGN

The elegant aesthetics is designed in collaboration with Italian designers, an attention to details that dares to be shown off

SYSTEM MANAGEMENT

Manage all Ariston products connected in system thanks to BusBridgeNet® technology

MADE IN EUROPE

Made in Europe

ANTI-CORROSION

Longer durability and high performance thanks to the anti-corrosion Pro-tech technology

EASY INSTALLATION

Installation time and process optimized in cooperation with experts and professionals

SOLAR INTEGRATION

It can be connected in system with Ariston solar-sourced products

MADE IN ITALY

Made in Italy

AG+ COATING

AG+ cartridge technology with antibacterial capability that actively stop the proliferation of E-Coli, Salmonella, Legionella, Mould Fungi & More.

EASY INSPECTION

Large inspection flange for an easier access to the internal components of the products

OUTDOOR INSTALLATION

Designed to be safely installed outside, resistant to all kinds of weather

COMPACT SIZE

Compact design with reduced dimensions for an easy fit at your home

EASY MAINTENANCE

Frontal access to all main components

ECO EVO FUNCTION

Automatic setting of its functioning based on your habits and needs of hot water

ANTI-LEGIONELLA

Automatic water heating cycle to prevent bacterial growth

ANTI-FREEZING

Works at cold temperature

INVERTER TECHNOLOGY

Frequency modulation of the external unit compressor

SOLAR KEYMARK

Compliant with European quality certification for solar systems

ELECTRONIC TEMPERATURE MANAGEMENT

Electronic control panel for easier, more intuitive operation.

TITANIUM PLUS

Longer durability and resistance to corrosion thanks to the Titanium enameling of the water tank

INTEGRATION WITH PHOTOVOLTAIC SYSTEM

Connection with photovoltaic systems

Wi-Fi

Smart Connectivity - Aqua Ariston Net App

WATER PLUS

It keeps the incoming cold water at the bottom of the tank to ensure reduced mixing with stored hot water

ABSOLUTE SAFETY SYSTEM

It is a set of functions preserving the good functioning of the product in case of energy or water failures

INCOLOY ENAMELED HEATING ELEMENT

It is corrosion resistant and reduces limescale

TITAN SHIELD

It is an anti-corrosion and rust-resistant protective technology which prevents the surface from corroding even when it is in contact with warm water

DIGIT DISPLAY

Easy interaction and easy temperature management thanks to the advanced hi-tech digit display

LED DISPLAY

Simple and intuitive multifunction LED display

DOUBLE SAFETY THERMOSTAT

In case of malfunctioning, the precise thermostat blocks heating cycle before reaching too high temperature

HIGH EFFICIENCY INSULATION

Premium and robust environmental-friendly insulation material made up of Cyclopentane

DISPLAY ECO

Frontal led control panel with smart thermometer

SHOWER READY

It shows when enough water has been heated for a shower

i-MEMORY

Function that learns your habits and chooses accordingly the best option between utilizing the renewable energy of the heat pump, and activating the heating element

DRY HEATING ELEMENT

The heating element is not in direct contact with water for long lasting durability and limescale protection

SAFETY PACKAGE

Set of functions preserving the good functioning of the product in case of energy or water failures

HAIL-PROOF

Hail-resistant thick glass

STABLE TEMPERATURE

Outlet temperature remains stable even in the case of flow rate variation

IP25 WATERPROOF

The TOP level in water protection guarantees a safety installation in shower box

CONSTANT TEMPERATURE

Hot water and constant temperature right when you need them, in every condition and regardless of any external factor (water flow, water's original temperature)

SINGLE POINT

It is corrosion resistant and reduces limescale

MULTI POINT

Can supply more water points at the same time (pressurized)

FLAT

Low depth for space saving and easy fitting at your home

ELECTRONIC TEMPERATURE MANAGEMENT

Electronic thermostat ensures an increase of energy saving and prevents scalding thanks to anti-overheating features.

POWER AND TEMPERATURE MANAGEMENT

Flow regulation knob plus temperature regulation knob and 4 steps axial regulation power to set the desired energy consume

MUTIPOSITION

Flexible installation, vertical or horizontal position

PERFORMANCE PLUS

Enhanced performance thanks to the high quality material selection to increase heat absorption and limit heat dispersion

EXTERNAL TEMPERATURE REGULATION EXTERNAL POWER REGULATION

Easy setting of the temperature/power, thanks to the external controller

After-sales service

First class service

Ariston service model is designed to offer efficiency and professionalism to all its customers.

Genuine Ariston spare parts

All Ariston spare parts are built and tested to guarantee the best possible quality and the reliability of your Ariston product. Using genuine Ariston spare parts and components is the only way to keep your system at its best, fulfilling legal and warranty requirements.

Maximum peace of mind

Ariston gives you the assurance of long-term product quality and safety, and in case of any potential problem it ensures that everything will be dealt with quickly and professionally.
